

#LOVENOTHATE A NEW WORLD COMING

Saturday, July 2nd 5pm location TBA

This is an opportunity to bear witness to the massacre in Orlando and to offer a visible challenge to HB2, the Public Facilities and Privacy Security Act, passed by the state of North Carolina legislators in March 2016. This law is generally recognized as the most anti-lgbtq piece of legislation in the US today. In addition to eliminating anti-discrimination protections for lgbtq people and legislating that individuals must use restrooms and changing facilities that “correspond to the sex on their birth certificate,” the bill also prohibits local municipalities in NC from setting a local minimum wage, regulating child labor, and enacting anti-discrimination policies. This witness will provide an opportunity to express your solidarity with those most impacted by this hostile legislation.
